

People Launching helps develop leaders for redemptive causes; and we are now partnering with iHub Africa for an international impact.

WHAT IS INNOVATION HUB AFRICA?

The Innovation Hub provides talented and passionate young people access to digital careers through innovative programs and training. Programs are developed to equip young people with either creative or analytical interests who do not have access to opportunities like this due to various economic, racial, or social barriers. Here are a few highlights of iHub:

- *A conducive, safe learning space
- *Teaching from digital industry leaders
- *Graduates have access to potential employment with partner companies or launching their own business
- *This program cost is FREE

WHERE ARE THEY?

Currently, there are two Innovation Hub locations in South Africa—just outside of Cape Town & Johannesburg. These locations have been strategically placed within under-resourced communities in order to help make them more accessible to our students. We are aiming to launch more locations across Africa.

HOW CAN WE HELP?

iHub utilizes coaches for development. The COVID-19 pandemic has presented many challenges to overcome and the need for local and virtual coaching has greatly increased. This is a perfect fit for People Launching, so it is our desire to help provide these needs by supporting the local coaches, recruiting additional partners, and growing international networks.

OUR GOAL

On September 9th, our team of runners will run a total of 206 miles to raise funds. Our goal is to raise ~\$1,111 per runner (**\$20,000 total**) **by September 1**. Would you please consider partnering with People Launching and iHub?
